Objectives:

My goal within this presentation is to bring to the table the *importance* of our role as parents.

The day we took responsibility and acknowledge that we must finish the course no matter how hard the journey becomes not leaving it up for others to fulfill but for us to **raise leaders!**

And when the course is completed and our children leave to take on their own journey we can look back and feel assured within our hearts we have done *our best* with our children instilling moral values, integrity building strong men and women to be integrated into society. Having them know their parents where there for them from beginning to end creating the winner they were born to be. **“WOW imagine that!**

It is our role as parents to nature our children without ANY reservations.

Our children are looking for role models to duplicate in a positive way in developing their own personality with the love and guidance by their parents whom they love.

The secret recipe is creating a team work attitude backed up with love, communication and commitment till the day they leave our nest! Don't ever kid yourself your children will take the memories you created for them into their lives. Then they can be reassured if they need advice on anything they can return back to their home that was built on the foundation of LOVE and TRUST!

Each time they look at a picture of their parents eyes filled with emotions only a child can explain...

“I LOVE YOU – THANK YOU FOR BEING THERE FOR ME.”

Imagine that duplication carried on throughout out your family tree!

“WE ARE AT WAR FOR OUR CHILDREN.”
